**Beery-Buktenica Developmental Test of Visual-Motor Integration, Sixth Edition (Beery VMI)**

<b>Availability:</b>	<p>Please visit this website for more information about this instrument:</p> <p><a href="#"><u>Beery-Buktenica Developmental of Visual Motor Integration Sixth Edition</u></a></p>
<b>Classification:</b>	<p><b>Supplemental:</b> Mitochondrial Disease (Mito), Multiple Sclerosis (MS), Neuromuscular Diseases (NMD), Spinal Muscular Atrophy (SMA) and Traumatic Brain Injury (TBI)</p>
<b>Short Description of Instrument:</b>	<p>The VMI helps assess the extent to which individuals can integrate their visual and motor abilities. The test presents the examinee with drawings of 24 geometric forms, arranged in developmental sequence, from less to more complex. The examinee simply copies these forms in the Test Booklet. The test can be individually or group administered in just 10 to 15 minutes. A Short Form, composed of 15 drawings, is often used with 2- to 8-year-old children.</p> <p>The VMI can be used by psychologists, learning disability specialists, school counselors, teachers, and other professionals to:</p> <ul style="list-style-type: none"> <li>• Identify individuals who may have difficulty with visual-motor integration</li> <li>• Make appropriate referrals for needed services</li> <li>• Test the effectiveness of educational and other interventions</li> <li>• Evaluate neuropsychological problems in older adults</li> <li>• Inform diagnoses of dementia or Alzheimer's</li> </ul> <p><b>Published date:</b> 2010</p> <p><b>Ages:</b> 2 – 18 y</p> <p><b>Norms:</b> In sixth edition updated norms for ages 2 through 18; Adult norms are included for ages 19 and above, but were not updated in this edition.</p>
