Conflict Behavior Questionnaire (CBQ) / Interaction Behavior Questionnaire (IBQ)

Availability:	Please email the author for information about obtaining the instrument: prinz@sc.edu
Classification:	Supplemental for Traumatic Brain Injury (TBI)
Short Description of Instrument:	<p>The Conflict Behavior Questionnaire (CBQ) also known as the Interaction Behavior Questionnaire (IBQ) was designed to obtain evaluations of parent and adolescent behavior directly from mother and adolescent. The questionnaire reliably measures whether or not a family is experiencing distress.</p> <p>Administration takes about 5 minutes. Separate versions are available for parents and adolescents.</p>
Scoring:	Raw scores are the number of items (up to 20) answered in a negative direction. Lower scores suggest better functioning.
