

Availability:	Please visit this website for more information about the instrument: Conners III Link
Classification:	Supplemental- Highly Recommended: Mitochondrial Disease (Mito): Highly recommended for studies that measure cognitive attention span.
Short Description of Instrument:	<p>Ratings scales of ADHD symptoms and associated behaviors. Forms available for parent, teacher and self report.</p> <p>The Conners 3 is the result of four years of extensive product research and development. School psychologists, clinicians, psychiatrists, pediatricians, child protection agencies, and mental health workers can count on the Conners 3 to be reliable and dependable tool capable of supporting them in the diagnostic and identification process.</p> <p>Based on the solid findings and key elements of its predecessor, the Conners' Rating Scales–Revised (CRS–R™), the Conners 3 offers a thorough assessment of ADHD. The Conners 3 now addresses comorbid disorders such as Oppositional Defiant Disorder and Conduct Disorder. Each parent, teacher, and self-report form is available in fulllength and short versions.</p>
Scoring:	<p>The Conners 3 now has the following two scoring options for the MHS Online Assessment Center and the MHS Scoring Software:</p> <ol style="list-style-type: none"> 1. DSM-IV-TR™: DSM Symptom Scales are scored based on diagnostic criteria in the Diagnostic and Statistical Manual of Mental Disorders Fourth Edition Text Revision (DSM-IV-TR). 2. DSM-5: DSM Symptom Scales are scored based on diagnostic criteria in the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition (DSM-5).
