The Eriksen Flanker Test**

Availability:	<p>The instrument is freely available here:</p> <p>Eriksen Flanker Test</p>
Classification:	<p>Supplemental for: Epidemiologic TBI</p> <p>Basic for: Acute Hospitalized TBI, Moderate/Severe Rehabilitation TBI and Concussion/Mild TBI</p>
Short Description of Instrument:	<p>The Eriksen Flanker Test is a computer-based test. Arrow stimuli appear on the screen and either appear alone or are flanked by arrows that either point in the same direction or the opposite direction to the target arrow. Response inhibition is compared between the two test conditions.</p> <p>The variable of interest is the subject's reaction time.</p>
Scoring:	<p>There are no restrictions on use/interpretation of this test.</p>
