Time Compressed Sentence Test (TCST)**

Availability:	Please visit this website for more information about the instrument: Time Compressed Sentence Test
Classification:	Supplemental: Acute Hospitalized, Concussion/Mild TBI, Epidemiology, Moderate/Severe TBI: Rehabilitation Traumatic Brain Injury (TBI)
Short Description of Instrument:	The Time Compressed Sentence Test (TCST) was developed to identify and quantify disorders of auditory processing in children. The test consists of sentences that were time compressed at 0, 40, and 60%. The test is used to identify temporal processing disorders. There is one practice subtest and four scored tests in all.
Scoring:	Normed scores
