## International Spinal Cord Injury – Spinal Column Injury
### Basic Data Set Form

**Penetrating/blunt injury**
- □ Blunt
- □ Penetrating
- □ Unknown

**Spinal column injury**
- □ No
- □ Yes
- □ Unknown

**Single or multiple spinal column level injury (-ies)**
- □ Single
- □ Multiple
- □ Unknown

### Spinal Column Injury (one to be filled in for each level of injury, starting with the most cephalic injury):

**Spinal column injury number**

**Spinal column injury level**
- vC00-vC07 - Cervical (C0-C7)
- vT01-vT12 - Thoracic (T1-T12)
- vL01-vL05 - Lumbar (L1-5)
- vS01 – vS05 - Sacrum (S1-5)
- vC99 – Unknown Cervical (C0-C7)
- vT99 – Unknown Thoracic (T1-T12)
- vL99 – Unknown Lumbar (L1-L5)
- vS99 – Unknown Sacral (S1-S5)
- vX99 - Unknown level

**Disc / Posterior ligamentous complex injury**
- □ No
- □ Yes
- □ Unknown

**Traumatic translation**
- □ No
- □ Yes
- □ Unknown
Proposed 8 Character Variables:

<table>

<td>KEY- Must be included in Table 1 and Table 2</td>
<td>KEY- Must be included in Table 1 and Table 2</td>
<td>Date of collection is not collected because assessing the spinal column injury is only done once and when it is assessed (beginning, middle, end of study) does not matter, therefore date of collection is not needed.</td>
<td>Record the injury number if 2 or more injuries were experienced. Check against single/multiple variable to ensure only one record exists if Single was checked, and 2 or more records exist if Multiple was checked.</td>
<td>Record for each level of injury, starting with the most cephalic, if there are multiple injuries. Check against single/multiple variable to ensure only one record exists if Single was checked, and 2 or more records exist if Multiple was checked. C0 refers to occiput.</td>
<td></td>
