

## Headache Version 2.0 NINDS CDE Project

**Subgroup in Headache:** Demographics

**Completed by:** Ann Scher (Chair)

- 1. Approach for selection of elements** (*How did you go about drafting the recommendations and/or reviewing the current tools/instruments, and did you have any criteria for selection and classification?*)

The Demographics working group reviewed the relevant 1.0 recommended CDE's. The working group made some minor changes to the existing CDE's, including changing classifications of CDE's (i.e., which elements were considered core).

- 2. Differential application to types of Headache** (*Do the instruments/elements you recommended differ between the types of Headache?*)

No. The demographic elements did not differ according to headache types.

- 3. Recommendations Summary Table:**

Instrument / Scale Name	Domain	Subdomain	Classification (e.g., Core, Supplemental Highly Recommended, Supplemental, Exploratory)
Demographics	Participant Characteristics;	Demographics	Core Items: Date of Interview, Birth date, Gender, Ethnicity, and Race.  All remaining items are Supplemental.
Social Status	Participant Characteristics;	Social Status	Core Items: Education Level, Martial/Partner Status, Employment Status  All remaining items are Supplemental.
Vital Signs	Assessments and Examinations	Vital Signs and Other Body Measures	Core Items: Date and Time of Reading, Blood Pressure, Weight and Height Measurements  All remaining items are Supplemental.

Instrument / Scale Name	Domain	Subdomain	Classification (e.g., Core, Supplemental Highly Recommended, Supplemental, Exploratory)
Behavioral History	Participant History and Family History	General Health History	All items are Supplemental.
Pregnancy Information	Participant History and Family History	General Health History	All items are Exploratory.
Pregnancy Outcome	Participant History and Family History	General Health History	All items are Exploratory.

**4. Comparison to other Headache standards** *(Are there any notable similarities/differences in the CDE recommendations as compared with other standards?)*

N/A

**5. Issues unique to Headache** *(Were there any issues encountered when developing the CDE standards which are unique to Headache or which highlight a unique concern about Headache data collection?)*

N/A

**6. Unmet needs; unanswered questions** *(What unmet need / unanswered questions were identified via the CDE process in Headache? What areas are in need of further research and development?)*

N/A
