Neuromuscular Disease (NMD) CDE Highlight Summary

NIH Resources
The NINDS also strongly encourages researchers to use these NIH developed materials for NINDS-sponsored research, when appropriate. Utilization of these resources will enable greater consistency for NINDS-sponsored research studies. These tools are free of charge.

- National Institutes of Health (NIH) Toolbox
- Quality of Life in Neurological Disorders (Neuro-QOL)
- Patient-Reported Outcomes Measurement Information System (PROMIS)

Suicidal Ideation
Investigators should review the FDA’s "Guidance for Industry: Suicidal Ideation and Behavior: Prospective Assessment of Occurrence in Clinical Trials" for the most up-to-date information about suicidal ideation and behavior. One scale that FDA suggests is the Columbia Suicide Severity Rating Scale (C-SSRS) (available at Columbia Suicide Severity Rating Scale website).

| Disease/Injury Events/History of Disease/Injury Event | **Core:** Medical History of NMD  
**Supplemental – Highly Recommended:** None  
**Supplemental:** Medical History of NMD  
**Exploratory:** None |
| Assessments and Examinations/Physical/Neurological Examination | **Core:** None  
**Supplemental – Highly Recommended:** None  
**Supplemental:** Physical Examination, Polysomnography  
**Exploratory:** None |
| Assessments and Examinations/Vital Signs and Other Body Measures | **Core:** None  
**Supplemental – Highly Recommended:** None  
**Supplemental:** Vital Signs  
**Exploratory:** Vital Signs |
| Assessments and Examinations / Laboratory Tests and Biospecimens/ Biomarkers | **Core:** None  
**Supplemental – Highly Recommended:** Fat Aspirate Tissue Specimens, Muscle Biopsy and Autopsy Tissue, Mutation Analysis, Skin Biopsies for Qualification of Intraepidermal Nerve Fibers, Laboratory Tests and Tracking, Peripheral Nerves – Biopsies and Autopsies  
**Supplemental:** Biomarkers Sample Data Guidelines, Biospecimen Collection Guidelines for Use, Gene Table and Guidelines for Use, Laboratory Tests Recommendations Table and Guidelines for Use, Muscle Biopsy and Autopsy Tissue, Mutation Analysis, Skin Biopsies for Qualification of Intraepidermal Nerve Fibers, Fat Aspirate Tissue Specimens, Peripheral Nerves – Biopsies and Autopsies  
**Exploratory:** None |
| Assessments and Examinations/Imaging Diagnostics | **Core:** None  
**Supplemental – Highly Recommended:** None  
**Supplemental:** Brain Magnetic Resonance Imaging (MRI), Cardiac Magnetic Resonance Imaging (MRI), Diffusion Tensor Imaging (DTI), Dual-Energy X-Ray Absorptiometry (DEXA), Echocardiogram, Magnetic Resonance Imaging (MRI), Magnetic Resonance Spectroscopy (MRS)  
**Exploratory:** None |
